

**Subject:** Here is your answer to "Re: I need more information be"

**From:** knowledgebase@redhat.com

**Date:** Mon, 12 Dec 2005 03:26:56 -0500 (EST)

**To:** huntrods@athabascau.ca

**You asked:**

Re: I need more information because the answer tells me that: a) there is no tomcat currently available for Enterprise Linux AS ver 4. b) it tells me that Tomcat 5.0.30 will be ready 'soon'. SO... when is soon? A date should be part of this answer. Thanks.{5694}

**Resolution:**

Thank you for using the Red Hat Knowledgebase! Red Hat technicians are working hard to populate our Knowledgebase with the answers you are looking for. Tomcat should be out for the Application Server child channels. If you have a support contract with Red Hat, please feel free to open a trouble ticket at <http://www.redhat.com/support/> to have your problem resolved. Thank you for your suggestion. Regards, Athene
